

## Semen Analysis

# **The Medical Microbiology Department of the Infection & Immunity Directorate no longer undertakes semen analysis for infertility or post vasectomy screening.**

Testing services are now provided by the Andrology Laboratory situated within the Liverpool Women's NHS Foundation Trust.

The following links access information about the service provided by the Andrology Laboratory (Click to open up the web pages):

Patient's Leaflet:

Clinicians and General Practitioners wishing to arrange an appointment for semen analysis (including post-vasectomy analysis) should fax over a referral to 0151 702 4152.

This referral needs to contain the patient details and home address.

The Andrology Laboratory will then send a semen analysis pack out to the patient containing the necessary paperwork and specimen container(s) with instructions for the patient to contact the department to arrange an appointment.

The Andrology department endeavours to return results within 2 weeks of the patient's attendance.
